Starter kit

FREE STARTER KIT

The AI Literacy *Starter Kit.*

A ready-to-adapt programme for meeting Article 4 of the EU AI Act: a gap-assessment worksheet, a role-based training matrix, and a completion log you can put to work this week.

AI literacy is *already the law*.

Since **2 February 2025**, Article 4 of the EU AI Act has required every **provider** and **deployer** of AI systems to ensure a **sufficient level of AI literacy** among the staff and other people who operate or use AI on their behalf. It is one of the few duties already in force — and it applies to **all** AI systems, not just high-risk ones, and to non-EU organisations in scope of the Act.

WHAT THE LAW ACTUALLY ASKS FOR

There is **no prescribed curriculum, no fixed number of hours, and no certificate**. You must take **measures** to build literacy that fit your people's roles, technical knowledge and the context in which they use AI — and be able to **demonstrate** those measures if a supervisory authority asks. In practice that means a written programme, role-appropriate training, and records. This kit gives you all three.

How to use this kit

1

Run the gap assessment

Answer the worksheet on the next page to see where you stand today and who needs what.

2

Map training to roles

Use the matrix to decide the right depth of literacy for each group, from leadership to power users.

3

Record completion

Log who was trained, on what, and when — the evidence that turns a good intention into a defensible measure.

The gap-assessment *worksheet*.

Work through these prompts with whoever owns AI governance. Honest “no” and “not sure” answers are the point — they are your backlog.

TEMPLATE

Where do we stand on AI literacy?

WHO OWNS AI LITERACY IN OUR ORG?

WHICH TEAMS USE AI TODAY (INCL. AI
INSIDE SAAS TOOLS)?

ARE WE A PROVIDER, A DEPLOYER, OR
BOTH?

DO STAFF KNOW WHICH TOOLS ARE AI, AND
THEIR RISK TIER?

HAVE WE BRIEFED STAFF ON THE
PROHIBITED PRACTICES (ART. 5)?

DO PEOPLE KNOW WHEN THEY MUST
DISCLOSE AI USE (ART. 50)?

IS THERE ROLE-SPECIFIC TRAINING FOR
HIGH-RISK SYSTEM OPERATORS?

WHERE IS OUR TRAINING DOCUMENTED,
AND WHO KEEPS THE RECORDS?

DATE OF LAST REVIEW / NEXT REVIEW DATE

SCORING IT

Every prompt you cannot answer with a confident “yes, and we can show it” is a literacy gap. Prioritise the ones touching **high-risk systems** and **prohibited practices** first — those carry the steepest penalties.

The role-based training *matrix*.

“Sufficient” literacy is different for a board member than for an engineer fine-tuning a model. Tailor depth to role. Adapt the rows to your organisation.

ROLE GROUP	LITERACY FOCUS	EVIDENCE TO KEEP
Leadership / board	AI Act obligations, risk tiers, penalties, governance accountability	Briefing deck + attendance
Compliance / legal / risk	Full Act, classification, FRIA, documentation, deadlines	Course completion + assessment
Product / engineering	High-risk requirements (Arts. 9–15), human oversight, logging, transparency	Training record + sign-off
Deployers / operators	Using systems per instructions, oversight duties, when to suspend, notices	Role training + acknowledgement
All staff (general)	What AI is, which tools are AI, disclosure (Art. 50), prohibited uses	Awareness module completion

MAKE IT PROPORTIONATE

An SME with three AI tools does not need an enterprise training academy. A short awareness session for everyone, plus deeper sessions for the people who build or oversee high-risk systems, is a defensible programme. Document the **reasoning**, not just the attendance.

The completion log.

The record is what makes your programme auditable. Keep one row per person per training, and review it on a set cadence.

NAME	ROLE GROUP	TRAINING	DATE	OWNER

Tip: store this alongside your AI system inventory so each high-risk system links to the trained people who oversee it.

NEXT STEP

Literacy is step one of many.

Once your people understand the Act, work out exactly which of your AI systems are in scope and what each one demands. Use the free **Risk-Tier Classifier** and the **AI Act Readiness Checklist** at aiact-navigator.com, and subscribe to The AI Act Brief so you hear when the rules change.
